NAVAL WHARF MAY

(Continued from Page One.)

discharge of Army and Navy coal and  
other material.

The docking of the Sheridan at the  
Oceanic wharf and the docking of the  
Dix at the Alaeka street wharf par-  
ticularly drew attention to the im-  
mediate need of the strengthening and  
repair of the Naval wharves.

Sheridan passengers, by the way,  
were rather confused yesterday in re-  
gaining their ship, some going to the  
channel wharf and others to the Na-  
val wharves before they got their  
bearings and remembered where they  
had disembarked, at the Oceanic  
wharf.

This was largely due to the fact  
that, upon inquiry, they learned that  
the Alaeka street wharf would take them  
to the waterfront, so, taking the Ala-  
eka street car and neglecting to tell  
the conductor what ship they sought,  
many were dumped at the end of the  
line, Punchbowl street, or at the Naval  
wharves, having to walk back to the  
Oceanic wharf.

Eighteen Chinese were arrested for  
non-payment of laundry license fees

provision of the section and act above  
referred to. Attorney Sutton of the  
Attorney General's office represented  
the Territory in the police court hear-  
ing this morning and the defendants  
were represented by Attorney Hum-  
phreys.

Judge Long declares the law to be  
unconstitutional for the reason that it  
gives to the Board of Health arbitrary,  
discretionary and legislative powers in  
that the law declares that the Treas-  
urer of the Territory cannot issue li-  
censes to laundrymen unless laundry-  
men have previously obtained from the  
Board of Health certificates to the ef-  
fect that the places where laundries  
are located are suitable for such pur-  
poses, thus placing in the hands of  
an agent of the Board of Health the  
power to say whether or not a laundry  
shall be conducted, a power which the  
Board of Health or its agents cannot

GOLD MINE FOUND  
IN DIAMOND HEAD

An employe of the United States gov-  
ernment working on a tunnel through  
the outer wall of Diamond Head crater,  
from the fort to the inner basin, is  
the discoverer of a vein of gold-  
bearing rock.

The erroneous verdict of alleged  
scientists years ago in regard to these  
islands was that no minerals were to  
be found in deposits. This was pre-  
sumably, based on the general assump-  
tion that since these islands were, or-  
dinary speaking, of volcanic forma-  
tion, they were too new to have de-  
veloped treasure stores of metal or  
gems; the fact that the Isles or a good  
portion of them may have been ancient  
to a great degree, before they were  
pushed above the surface of the ocean,  
evidently having been lost sight of.

Nevertheless there is the truth to  
be reported to the effect that gold has  
been found in Diamond Head.

This does not mean that there are  
huge pockets of already purified metal  
sticking out in bunches along the  
walls of the only just begun tunnel,  
but it does mean that a vein of rock,  
bearing gold ore, to the modest extent  
of about two or three dollars' worth to  
the ton of rock, has been placed, has  
been investigated, has been assayed  
and has been admitted by those in  
charge to be gold-bearing material.

Two to three dollars per ton, in the  
exercise in constitutional law.

This was the argument advanced by  
Humphreys and sustained by Judge  
Long who remarked that the validity  
of the right of the Treasurer to collect  
revenue did not remedy a law which  
was made unconstitutional by the il-  
legal provision giving undue power  
to the Board of Health or its agents.

The Chinese had the Board of Health  
certificates, but they did not possess  
receipts from the Treasurer for license  
fees. Hence charges were made  
against the Chinese washmen for viola-  
tion of the law, in that they had not  
paid their licenses; but inasmuch as  
the only way the law could be com-  
plied with would be by the Treasurer  
himself breaking the constitutional  
law by issuing licenses on unconstitutional  
certificates, a strange state of  
affairs was presented. The Territo-  
rial Treasurer must violate the con-  
stitution in order to collect revenue  
under the section named of Act 96 of  
the Session Laws of 1907.

The section referred to says: "Any  
such license shall not be issued ex-  
cept upon a certificate of the Board of  
Health setting forth that the location  
at which it is proposed to operate such  
laundry is suitable for the purpose."

Under Judge Long's ruling laundry-  
men need pay no licenses and such a  
condition of affairs is likely to remain  
until the Legislature meets and reme-  
dies the law.

A HOT TIME ON  
HILO'S BIG DAY

to have something at the next meeting  
which will give O'Rourke's cracks a  
rub.

It would greatly add to the value of  
the next program if the age and breed-  
ing of the entries were inserted.

J. T. Moir's sorrel gelding J. T., is  
said to be Expedient. When a horse's  
name is changed the fact should be  
stated on the program.

Banonica may be shipped to the  
coast. She can win most anywhere.

It is Starter Campbell's proud boast  
that since starting races in 1887 he  
has never left a horse at the post.

Trilby Green is a morning glory of  
the most pronounced type. She has  
speed to burn but refuses to race.

Just now horsemen are telling each  
other that it costs no more to stable  
and feed a good one than a had one.

Jockey Ferreira expects to receive  
a license to ride on the Coast tracks.

Jim McAuliffe expects to return to  
that dear Sydney.

gold-bearing rock, is not profitably  
working business, but there is no claim  
laid to the find in Diamond Head being  
a profitable proposition.

The point is, and it is of most sig-  
nificant scientific interest, that there is  
gold in Oahu and there is gold in Dia-  
mond Head, and it has not been claimed  
as a discovery by any wandering  
tramp or sensational tourist or hot-  
air speculator, but has been discover-  
ed by a Federal employe on Federal  
grounds.

The land is United States Army re-  
servation and if the vein should prove  
to be of greater yield further on, when  
the tunnel advances, it will be the  
United States government that will  
reap the benefits, nor will there be any  
chance of buying stock.

At present the yield is not worth  
working. Developments may prove  
otherwise.

The main point of interest is that  
the scientists were wrong when they  
said these islands were without min-  
erals (there's enough iron in the Ka-  
muk red dirt to pay if modern meth-  
ods were applied), and that the an-  
cient Hawaiians, before the coming of  
the white men, knew whereof they  
spoke when they declared, as appears  
in their legends, that Leahi (Diamond  
Head) was a storehouse of richness.
